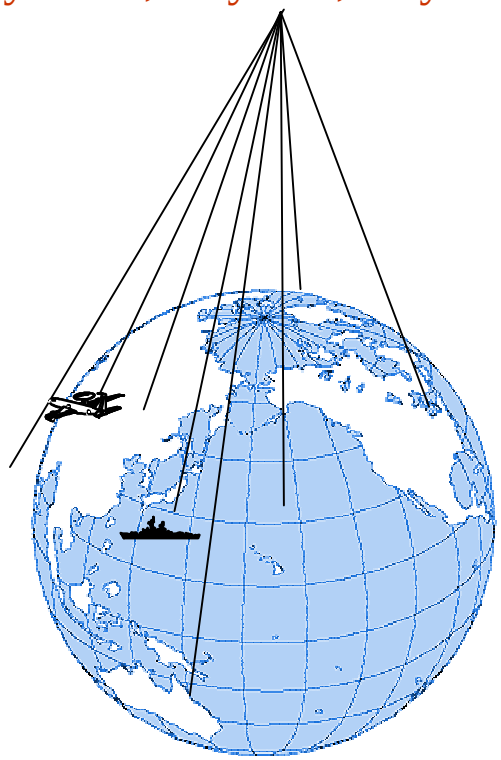
Vision for Distributed Collaboration

- Enable access across boundaries
  - Enable collaboration across the Theater including CINCPAC, components, sub-unified commands, supporting organizations, NGO, and coalition)
  - Approaches to cross security levels
- Provide interoperable scalable solutions
  - Employ solutions that are useful beyond small groups; e.g., CG, audio, and bridges
- Enabling the networked organization
  - People, information, and services
  - Collaboration ingrained in the functional business process as well as people oriented sessions
  - Reducing process seams and transitions between situation awareness, analysis, production, decision, dissemination, and action
  - Explore Network Centric Warfare

Collaboration
Anywhere, Anytime, Anyone



Approved for public release; distribution is unlimited.
