

PMW 146

The Communications Satellite Program Office (PMW 146) has overall responsibility for procuring the narrowband communications satellites for the Department of Defense. PMW 146 is a vital contributor to our nation's space program, helping to ensure information superiority for our warfighters and decision-makers who rely increasingly on space systems to enhance their combat effectiveness.

PMW 146, building on a strong and successful heritage of the Navy in space, puts the "space" in SPAWAR.

For further information on PMW 146, please contact the Program Office at (619) 524-7756, or visit our website at <http://www.pmw146.navy.mil>
